Friday

Thank God It's Them

TEAM
FRIDAY (13)

Presentation Overview

TEAM 13's PHILOSOPHY

SPRINT 1 GOALS & PROGRESS

**DEMO**

What is a key common factor in all successful companies ?

Having a core guiding principle.

Strength of conviction for that principle = degree of success

So, We Brainstormed.....

Friday's Objective

To maximize the probability that a customer will come to our 'Front door' and leave with a complete solution

NO HALF-MEASURES

Team 13

Inclusive Design

"No user left behind"

Left: The sliders on BrilliantEarth.com place the labels describing the slider increments below the slider track, where they will be obscured by the user's thumb during the interaction. Right: AirBnB.com correctly displays the slider values above the UI element, so they would remain visible throughout use.
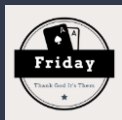

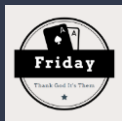

Extensive Documentation – How ?

"No user left behind" -> "Nobody left behind"

- Auto generated, clear API Documentation
- In depth onboarding docs for each step of the process

Sprint 1 Goals and Progress

Cement our processes
Diligent use of Clubhouse!

Get everyone's hands dirty
Pairwise task assignment
Confident help the not-so-confident

Get a basic slider working
Why a slider?

Motivation Behind Picking Components

- Slider + hello world component
- While working towards the future, still remember the past
- Make sure latest developments can operate with past components
- Developers know ALL components are ready to be used in their next project
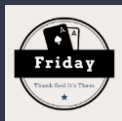

Yeah but really, Who uses sliders ?

Range input type 📄 - LS

Form field type that allows the user to select a value using a slider widget.

Usage	% of all users	?
Global	96.87% + 0.17% = 97.04%	

| Current aligned | Usage relative | Date relative | | Apply filters | Show all | ? |

IE	Edge *	Firefox *	Chrome	Safari	Opera	iOS Safari *	Opera Mini *	Android Browser *	Blackberry Browser	Opera Mobile	Chrome for Android	Firefox for Android	IE Mobile	UC Browser for Android	Samsung Internet
6-9		2-22				3.2-4.3		2.1-4.1							
10	12-17	23-65	4-73	3.1-12	10-57	5-12.1		4.2-4.4.4	7	12-12.1			10		4-8
11	18	66	74	12.1	58	12.2	all	67	10	46	74	66	11	11.8	9.2
	75	67-68	75-77	TP											

But why did we pick the slider ?
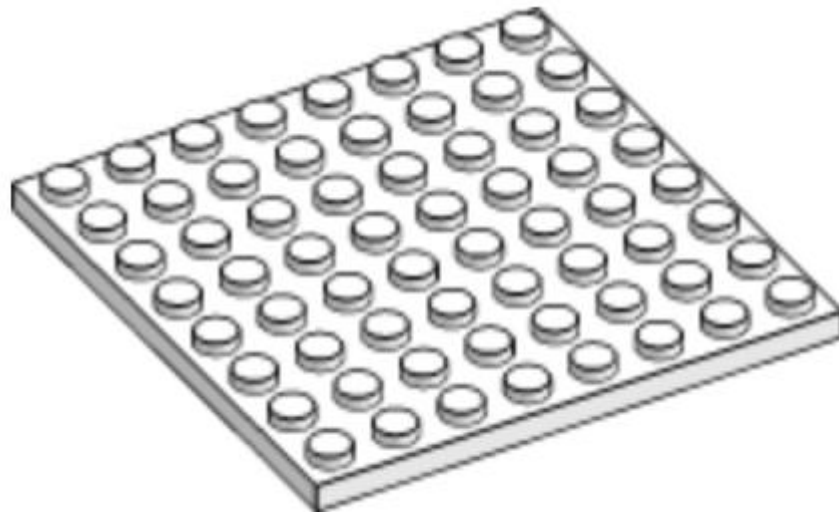

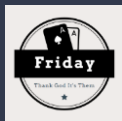

Requests from Thursday
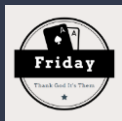

Boostrap Support!
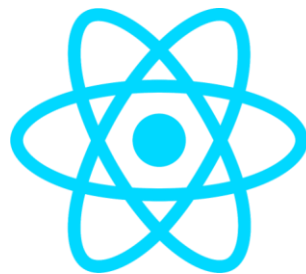

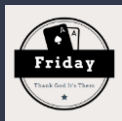

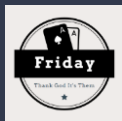

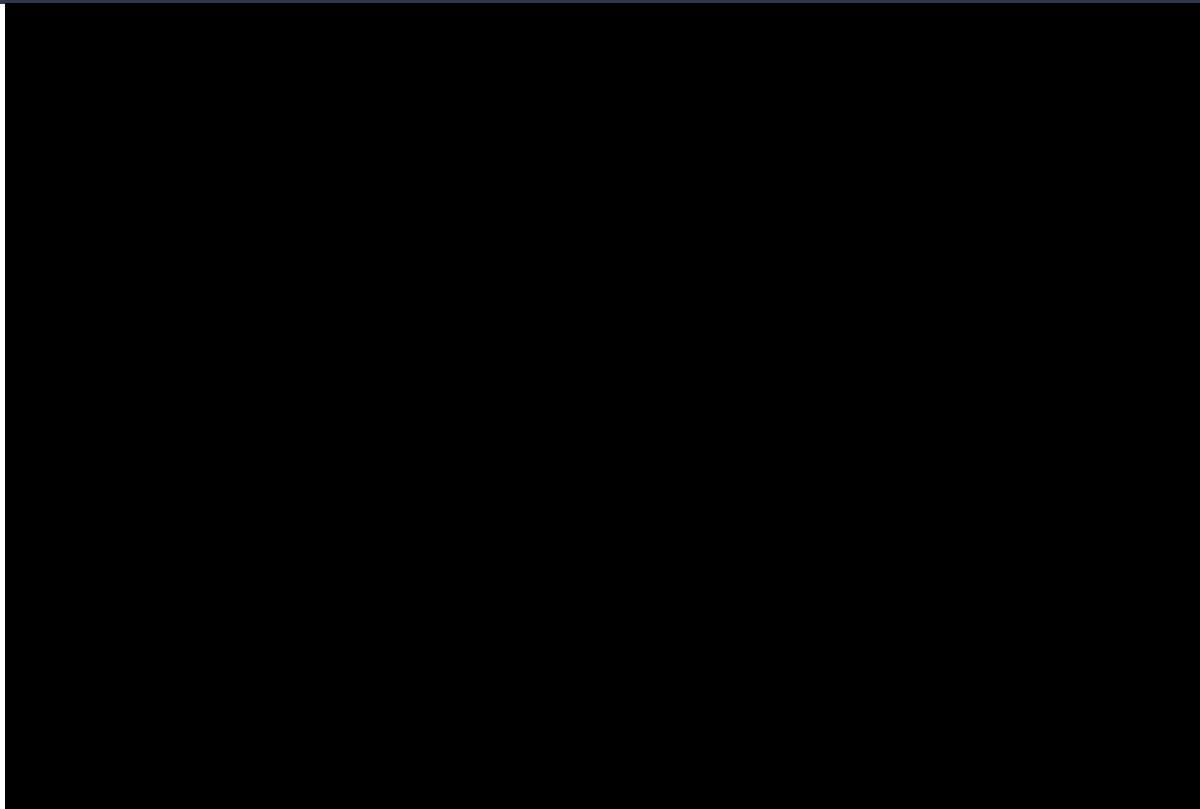

Why not React?

- Requires starting from scratch
  - New code, new research, new requirements
  - Past 7 weeks are lost
- Defeats purpose of web components
  - Platform-independent
- Significant startup time
 - Unlikely to have meaningful end result

LEGOS!

Team 13

Future Plans

Sore spots and **growing** pains

Changing testing frameworks
Increasing bus factor
Building technical knowledge

Continue to build on core-slider

To Element's specs and Beyond!
Core-input-box soon to follow...
